KPC-04 LEVEL PROCESS CONTROL TRAINER

KPC-04 Level control trainer is designed for understanding the basic Level control principles for the Level Process control mounted on Aluminum profile rack with sturdy table top flat panel. The process setup consists of supply water tank fitted with pump for water circulation. The level transmitter used for level sensing is fitted on transparent process tank. The process parameter (level) is controlled by microprocessor based digital indicating controller which manipulates pneumatic control valve through I/P converter. A pneumatic control valve adjusts the water flow in to the tank.. Each panel has ABS molded plastic sturdy enclosure with 4mm shrouded connectors showing circuit diagram & its connection tag numbers for easy understanding and connections.
